

Cilindri a cartuccia ritorno a molla – Serie CCM

Pressione max di esercizio 320 bar

Cartridge shape cylinders- spring return –CCM Series

Max working pressure 320 bar

Cilindri a semplice effetto in spinta

Disponibili in 3 modelli

Corse 5 e 8 mm.

Utilizzati solo con olio

Ingombri ridotti

Single action cylinders

3 models available

5 and 8 mm. strokes

Use with oil only

Small dimensions

DATI TECNICI • SPECIFICATIONS

MODELLO MODEL	forza di bloccaggio a 320 bar <i>locking force at 320 bar kN</i>	corsa <i>stroke</i> mm	volume olio <i>oil volume</i> cm ³	area di bloccaggio <i>locking area</i> cm ²
CCM.25.05	15	5	2,5	4,91
CCM.32.08 CCM.40.08	25 40	8	6,4 10	8,04 12,56

DESCRIZIONE e APPLICAZIONI

Cilindri senza camicia a semplice effetto di ingombri molto ridotti , operanti in spinta.

Vengono normalmente incassati nei masselli, per impieghi di bloccaggio di: stampi, carrelli, teste mobili ecc.

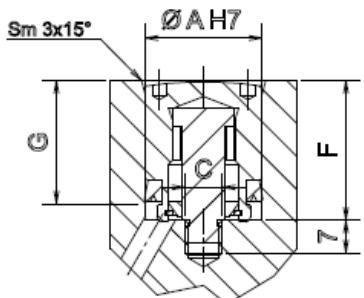

DESCRIPTION and APPLICATIONS

Cylinders without chamber, single acting, very small dimensions, working in thrust.

These cylinders are normally sit into manifold, for applications as locking of moulds, trucks, moving heads.

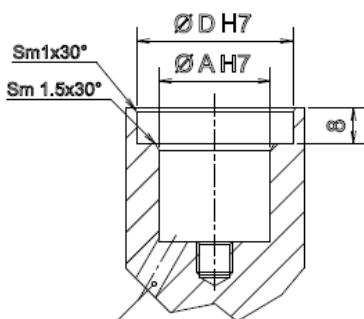

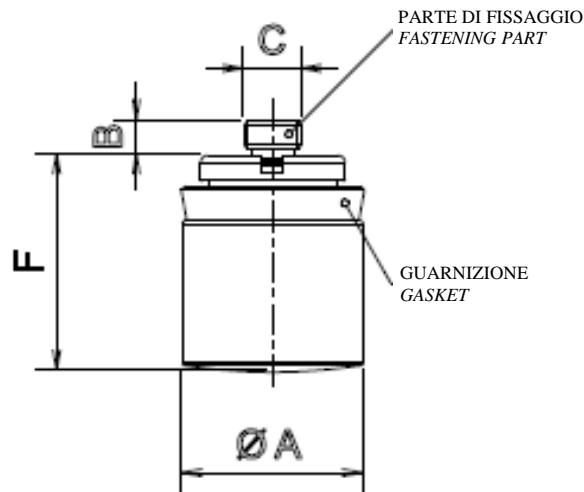

Non utilizzabili a fine corsa.
Not suitable for end-stroke applications.

ALLOGGIAMENTO PER VERSIONE SENZA RASCHIAPOLVERE

LODGING FOR VERSION WITHOUT DUST-SCRAPER

ALLOGGIAMENTO PER VERSIONE CON RASCHIAPOLVERE

LODGING FOR VERSION WITH DUST-SCRAPER

COME ORDINARE – HOW TO ORDER

CCM.--- senza raschiapolvere – without dust-scraper

CCM.---.R con raschiapolvere – with dust-scraper

MODELLO MODEL	Diametro A Diameter A mm	Area pistone surface area cm ²	Sforzo a 250 bar Force at 250 bar kN
PSL.22	22	3,79	9,4
PSL.30	30	7,06	17,6
PSL.32	32	8,03	20,1

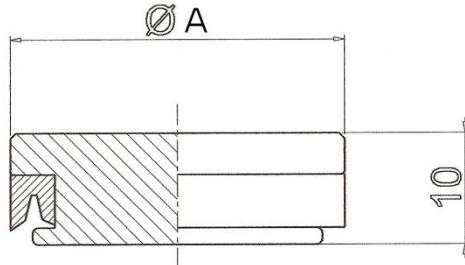

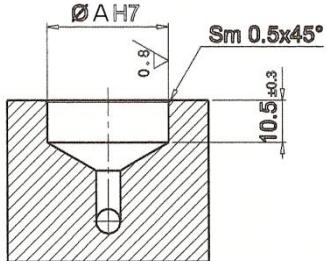

DESCRIZIONE e APPLICAZIONI

- Impiego per bloccaggio di carrelli e slitte
- Elevato rendimento e chiusura immediata
- In mancanza di pressione consentono scorrimento con bassissimo attrito
- Facile montaggio e ingombri ridotti
- Alloggiabili in sedi facili da eseguire

DESCRIPTION and APPLICATIONS

- Used for truck and slide locking
- High efficiency and immediate close
- In case of lack of pressure, they concur a very low friction during sliding
- Easy mounting and small dimensions
- Place in centers of easy execution

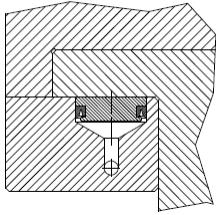

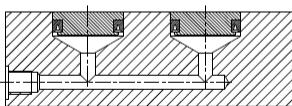

quote sede – center dimensions

In fase di esecuzione sedi prestare attenzione alla tolleranza sul diametro e alla rugosità della superficie cilindrica.
In phase of execution centers, be careful at the tolerance on the diameter and at the roughness of cylindrical surface.

➤ Esempi di installazione -Examples of application

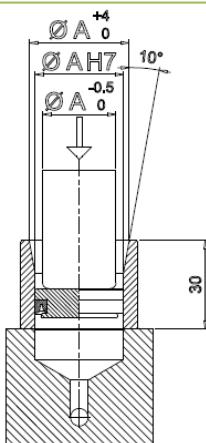

➤ Istruzioni di montaggio

Nel montaggio si consiglia l'impiego di bussola come figura sopra, quindi lubrificare la pastiglia, imboccarla delicatamente nella bussola, centralarla sull'alloggiamento e spingerla con un punzone, che determina l'inserimento della pastiglia.

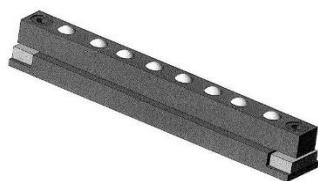

➤ Mounting instructions

During mounting the use of bushing as above showed is recommended, so lubricate the slide, introduce it softly into the bushing, center it on the placing and push it by a punch, by producing the insertion of the slide

Accessori per presse – Porta Stampi Serie PS

Accessories for presses – Mould Bolsters PS Series

DESCRIZIONE e APPLICAZIONI

- Disponibili 7 modelli.
- Supporto a sfere per posizionamento stampi e/o attrezzature su piano macchina.
- Sollevamento meccanico tramite molle a tazza.

DESCRIPTION and APPLICATIONS

- 7 models available.
- Support by spheres to position moulds and/or systems on machine.
- Mechanical lift by cup springs.
